## FOREWORD

An important aspect of Health Planning and Management is the collection, analysis and use of reliable health information . Indeed, an effective health information system contributes significantly to effective monitoring and evaluation of the progress of health system development in Cambodia .

This 12th National Health Statistics Report provides a wide range of information to all information users. Health care providers, managers and others at all levels are increasingly using health information obtained through the National Health Information system not merely for management of health service delivery and planning, but also for monitoring and evaluation of their activities and programs.

The Ministry of Health would like to take this opportunity to thank all partners, provincial and municipal health departments , other concerned departments and centers, as well as various organizations for their collaboration in making this edition possible.

Director General for Health

Phnom Penh, August 2007

## INTRODUCTION

For more than a decade, the Ministry of Health's (MOH) Health Information Bureau (HIB) under the Department of Planning and Health Information (DPHI) has been publishing an annual compendium of health data called the National Health Statistics (NHS), based on statistics generated from the nationwide Health Information System (HIS). The current report follows this tradition in containing health statistics pertaining to the year 2006.

This edition of the report contains some differences from those of previous years, aimed primarily at making the data more easily understandable. Finally, a brief narrative has been added for some of the key statistics. As noted in the following Table on data coverage, all 24 provinces, as well as the nine national hospitals have submitted regular monthly reports on patient statistics and utilization for 2006. Where necessary, these have been aggregated to show country-wide totals or averages.

A couple of caveats should be kept in mind while perusing the data. These data are exclusively based on information received from public health facilities and those national hospitals supported either fully or in part by public funds. In that sense, this report cannot provide an accurate picture of health facilities whose data are not included in this report. The Bureau continues to make efforts to encourage private practitioners to file regular reports with the MOH in this regard. Interested readers may wish to consult findings from several recent national surveys such as the Cambodia Inter-census Population Survey 2004 (CIPS), the Cambodia Socio-Economic Survey 2004-05 (CSES), and the Cambodia Demographic and Health Survey 2005-06 (CDHS) to supplement the information contained in this report. For road traffic accident injuries, additional information can be obtained from the Cambodia Road Traffic Accident and Victim Information System's monthly and annual reports published jointly by the Ministries of Interior, Health, and Public Works and Transport, with technical assistance from Handicap International Belgium ([www.cnetp.info](http://www.cnetp.info)).

For inquiries about the data contained in this report, or to provide suggestions for future improvements to the report, readers are encouraged to contact the Health Information Bureau, Department of Planning and Health Information at the Ministry of Health, 151-153 Kampuchea Krom Blvd, Phnom Penh, Tel:023.427.368 or email:[buthsaben@yahoo.com](mailto:buthsaben@yahoo.com) and [dararith\\_york@yahoo.com](mailto:dararith_york@yahoo.com)
